

Stop Pulling ... Make Real Money!

Why pull at all?

**STABILOY® MC Cable provides the same solution.
In armor. No conduit. No pulling.**

Our STABILOY® MC Feeder Cable is engineered to include all the exceptional characteristics of a pipe and wire installation in one rugged assembly. This saves you time and money on job site installations. STABILOY MC Cable is approved with PVC insulation for use outdoors, in wet locations, direct buried, encased in concrete, and in certain hazardous locations.

- Fewer installation steps
- Fewer materials needed
- Larger reels allow easier site management and less waste
- Meets or exceeds NEC requirements and applicable UL Standards
- All conductors are STABILOY® AA-8030 electrical grade alloy with type XHHW-2 insulation

They say time equals money!

With Over 50% in time savings, MC Cable is the smart choice.
