

# More Power Will Make Them Red with Envy

## Turn Your Drake Into a Cardinal!

**Safely push 15-35% more power through your existing transmission lines today!**

Promethean Devices™ real-time monitoring system improves transmission reliability, relieves congestion, and enhances asset utilization:

- Non-contact, real-time, high-accuracy line data
- Outage(s) not required for installation or maintenance
  - Utility field crews and equipment not required
  - Fast installation above or below ground
  - Reliable, secure data, and data delivery
- Can be redeployed in 30-60 days to another location
